- Teachable, passionate, and willing to learn new ideas and concepts.
- Excellent written, oral, and verbal communication skills required.
- Strong attention to detail with excellent analytical and judgment capabilities required.
- Must have a valid driver's license and a good driving history/record.
- Authorized to work in the USA. OPT/Work permit in USA is required at minimum.

Responsibilities:

- Summary: The Lead Architect is ultimately accountable and responsible for the design, architectural drawings and permitting of all projects designed in house
- For projects designed with outside architects, the Lead Architect will need to be involved to monitor and potentially contribute for consistency and assurance that best industry practices are followed.
- Develop new architectural products for the marketplace.
- Bring your desire for accuracy and knowledge of residential construction and codes to work for a team that really cares.
- Develop relationships with external partners and lead the team towards success!

- Leads all aspects such as permitting, compliance, structural integrity, design aesthetics with ease.
- This individual will define company architectural standards and procedures, be the resident expert in design/architecture for clients and the company, manage department workflow, and complete designs and construction drawings.
- Oversee the quality of work in the Architecture Department.
- Maintain current job knowledge to be the resident expert for design, building codes, and cutting-edge building technology.
- Performs site visits for measurements, elevations, and house layouts.
- Make product and design recommendations to clients based on their taste, style, and budget
- Request bids for structural components (concrete, framing, etc.)
- Complete construction drawing, submit county permitting packages including site plans, VDOT, health, and building permits.
- Responsible for supervision, training and development of the Design Team and analyze their performance and progress.
- Engage with clients to understand their needs and provide design/build solutions that transform their houses into homes.
- Work with Project Leader (PL) to create as-built drawings, schematic design drawings, design and development drawings, construction document and permit drawings.
- Research latest design trends (materials, finishes, fixtures, appliances, etc.)
- Work with the production team as required to incorporate current construction techniques and value engineering as an integral part of the Design/Build process.
- Drive design efficiency within the Design Team by evaluating software and assigning/amending workflow.
- Allocate resource management effectively. i.e. assign designers when exceptions occur, finalizing and approving the Design Department Requests
- Source and develop technological solutions for sales presentations and client meetings as well as efficiencies within the Design Team such as 3D Renderings
